SUMMARY

Aspiring computer science engineer pursuing Bachelor's in CSE, skilled in AI driven healthcare tools using Python. Proficient in C++, C, Python, SQL, HTML and CSS, with knowledge of JAVA, Git, and many LeetCode problems solved. Passionate about building efficient, user-friendly systems that solve real world problems. Actively seeking roles for Software Developer Engineer/Intern to contribute creativity, resilience, and technical expertise to impactful projects.

EDUCATION

• Bachelor of Engineering – Computer Science

Cambridge Institute of Technology, Bengaluru | VTU, Belagavi | 2022 – Present | CGPA: 8.8 (Till 7th Sem)

• Class XII – PCM

National Institute of Open Schooling (NIOS) | 2020 – 2022 | Percentage: 67%

SKILLS

- **Languages :** C++, C, Python, SQL, JAVA
- **Web Development:** Node.js, HTML, CSS, Bootstrap
- **Machine Learning :** Pandas, Numpy, Scikit-Learn, GenAI
- **Database & Tools :** MySQL, MongoDB, GIT, RESTful APIs, OpenAI API, LangChain, FAISS
- **Platforms :** VS Code, Jupyter Notebook, Google Colab
- **Soft Skills :** Leadership, Collaboration, Excellent Communication, Organizational & Management Skills

PROJECTS

1. AI-Powered Mental Health Prediction and Personalised Assistance System:

- Developed AI-powered mental health chatbot using NLP to analyze user sentiment and provide personalized coping strategies, well-being recommendations, and mental health resources; achieved over 85% sentiment analysis accuracy.
- **Tech Stack:** Python, NLP, NLTK/spaCy, Flask, Machine Learning

2. RAG-based HR Chatbot using LLMs:

- Developed an intelligent RAG chatbot to answer queries using company documents as context. Implemented document ingestion, text chunking, embedding generation, and semantic search with vector databases to retrieve relevant information. Integrated LLM for context-aware answer generation with high accuracy and reduced hallucination.
- **Tech Stack:** Python, LangChain, OpenAI API, FAISS, FastAPI, HuggingFace Embeddings, NumPy

3. Image Colorisation using Python:

- Developed project using CNNs and pre-trained Caffe models to convert grayscale images to realistic color. Implemented image preprocessing, LAB color space conversion, and real-time visualization using OpenCV; colored 500+ images with high visual accuracy.
- **Tech Stack:** Python, OpenCV, Caffe, CNN, NumPy

CERTIFICATIONS

- Joy of Computing Using Python – NPTEL, IIT Madras , 2025
- Introduction to Algorithms – NPTEL, IIT Kharagpur , 2024
- Problem Solving Through Programming in C – NPTEL, IIT Kharagpur , 2023

KEY ACHIEVEMENTS

- A state level athlete and led the organization of Chiguru, a state-level sports tournament with 132 teams and over 1000 participants.
- Co-organized a licensed TEDx event at Cambridge Institute of Technology, Bengaluru.
- Managed finance and operations as the Finance Head and Operations Lead at Cambrian Open House, ensuring smooth budgeting, procurement, and event workflow
