

FAISAL IMAM

(Computer Science Engineer)

📞 9608953402 • ✉ imamfaisal36@gmail.com • [in](#) [faisalimam19](#) • [🌐](#) [faisalimam1](#) • [🌐](#) [Portfolio](#)

SUMMARY

Aspiring CS Engineer, skilled in AI and Machine Learning driven healthcare tools using Python. Proficient in C++, Python, C, SQL, HTML, and CSS, with knowledge of Java, Git, and experience in solving numerous Kaggle and LeetCode problems. Passionate about building efficient, data-driven, and user-friendly systems that solve real world problems. Currently developing expertise in AI, ML and DL, including data analysis, feature engineering, and model building. Actively seeking fresher AI Engineer roles to contribute creativity, resilience, and technical expertise to impactful projects.

EDUCATION

- **Bachelor of Engineering – Computer Science**
Cambridge Institute of Technology, Bengaluru | VTU, Belagavi | 2022 – Present | CGPA: 8.8 (Till 7th Sem)
- **Class XII – PCM**
National Institute of Open Schooling (NIOS) | 2020 – 2022 | Percentage: 67%

SKILLS

- **Languages :** C++, Python, C, SQL, JAVA(Basics)
- **Web Development:** HTML, CSS, Bootstrap
- **Machine Learning :** Agentic AI, Classification, Regression, Logistic Regression, NLP, Random Forest, Model Evaluation, Overfitting & Underfitting
- **Data Analysis & Tools :** EDA, Feature Engineering, Data Preprocessing, Pandas, NumPy, Scikit-learn, Matplotlib, GIT, CrewAI, OpenAI API
- **Soft Skills :** Leadership, Collaboration, Excellent Communication, Organizational & Management Skills

PROJECTS

1. [AI-Powered Mental Health Prediction and Personalised Assistance System](#) 🌐
 - Developed AI-powered mental health chatbot using NLP to analyze user sentiment and provide personalized coping strategies, well-being recommendations, and mental health resources; achieved over 85% sentiment analysis accuracy.
 - **Tech Stack:** Python, NLP, NLTK/spaCy, Flask, Machine Learning, TF-IDF, Librosa, DeepFace
2. [RAG-based HR Chatbot using LLMs](#) 🌐
 - Developed an intelligent RAG chatbot to answer queries using company documents as context. Implemented document ingestion, text chunking, embedding generation, and semantic search with vector databases to retrieve relevant information. Integrated LLM for context-aware answer generation with high accuracy and reduced hallucination.
 - **Tech Stack:** Python, LangChain, OpenAI API, FAISS, FastAPI, HuggingFace Embeddings, NumPy
3. [SMS Spam Classifier – NLP Classification & Deployment](#) 🌐 [Live Demo](#)
 - Developed a spam detection model using Multinomial Naive Bayes and TF-IDF vectorization on 5,572 SMS messages, achieving F1 Score of 93.43% and Cross-Validated F1 of 90.99% across 5 stratified folds; improved recall by 7% through decision threshold tuning (0.5 → 0.3) based on business context.
 - Built complete text preprocessing pipeline (stopword removal, Porter Stemming, regex cleaning) and deployed.
 - **Tech Stack:** Python, Scikit-learn, NLTK, TF-IDF, Naive Bayes, Gradio, Hugging Face Spaces

CERTIFICATIONS

- [Joy of Computing Using Python](#) – NPTEL, IIT Madras, 2025
- [Introduction to Algorithms](#) – NPTEL, IIT Kharagpur, 2024
- [Problem Solving Through Programming in C](#) – NPTEL, IIT Kharagpur, 2023

KEY ACHIEVEMENTS

- A state level athlete and led the organization of a state-level sports tournament with over 1000 participants.
- Co-organized a licensed TEDx event at CIT, Bengaluru and author of an IEEE paper (accepted for IEEE Xplore).
- Managed finance and operations as the Finance Head and Operations Lead at COH, ensuring smooth budgeting.
